

Yaesu FT-2000 Equalizer settings

**These have been tested using the MD-100 microphone.
These also works great with the MH-31b8 original hand mic.**

Menu 83 : 3000 (TX bandwidth)

Parametriq EQ (withouth PROC)

Menu 123 : 100
Menu 124 : +6
Menu 125 : 3
Menu 126 : 1000
Menu 127 : -5
Menu 128 : 5
Menu 129 : 3200
Menu 130 : +10
Menu 131 : 1

Parametriq EQ (with PROC)

Menu 132 : 100
Menu 133 : -10
Menu 134 : 6
Menu 135 : 800
Menu 136 : -3
Menu 137 : 8
Menu 138 : 2400
Menu 139 : +10
Menu 140 : 1

Don't forget to push and hold MENU for 2 seconds to exit and store new settings !

Mic gain at 11 - 12'o clock

PROC gain at 9 - 11'o clock (any more than 11'o clock creates distortion)

Using PROC really cuts throug in noisy band conditions.

VERY IMPORTANT !

Distance to MD-100 : around 20 cm. (8 inches).

Please set all controls underneath the MD-100 in the OFF/THRUE position.

Distance to MH-31b8 : around 10cm. (4 inches) any closer will create breathing noise (very unpleasant).

Other menu settings :

Menu 050 : A3E mic gain (AM) : 90

Menu 072 : F3E mic gain (FM) : 25

Good Luck !
