

# THE OCEANIA DX CONTEST

## 2013 Results

Dave **NH2T** used this simple set of antennas to win the Oceania Single Operator ALL Band High Power category in both the PHONE and CW sections, as well as setting a new Oceania CW record. You can see Dave's spider beam in the foreground and his low band vertical in the background.

# 1. Summary of 2013 Results

## Introduction

Congratulations to all the winners in the 2013 Oceania DX (OCDX) Contest and thank you to everyone who participated, even if only to make one or two QSOs.

Conditions were generally good although reduced solar flux on the PHONE weekend meant that there was less PHONE activity on 10M. The total number of logs received was 1244 which is 15 less than the record of 1259 logs received in the 2011 contest. There was a notable increase in the number of logs from Australia in the CW section, and from Indonesia, New Zealand and other countries in Oceania in both the PHONE and CW sections. This increased activity from Oceania stations is encouraging, as growing Oceania participation is critical for attracting more participation from stations outside Oceania.

The OCDX Contest Committee has created a database to identify all of continent and county records in the contest since the current scoring was introduced in 2001. A list of the new continent records set in 2013 is provided in Table 8 of this report. The full list of records is available on the contest web site at <http://www.oceaniadxcontest.com/>.

The terrific effort of Dave Mueller at **NH2T** deserves special mention. Dave has won the prestigious Oceania SO ALL HP category in both the PHONE and CW sections, as well as setting a new Oceania CW record. This was Dave's last entry from KH2 as he is now in the process of relocating QTH from Guam to Hawaii. Dave has indicated that he looks forward to continuing to participate in the future with a KH6 call sign.

Some of the other notable performances include:

- **HSOZIA** for setting new Asia records in both the PHONE M1 and CW M1 categories.
- **JA7BEW** for setting a new Asia record in the PHONE SO ALL LP category.
- **JA7NVF** for setting a new Asia record in the PHONE SO ALL HP category and achieving the highest score outside Oceania in the PHONE section of the contest.
- **JH4CES** for setting a new Asia record in the CW SO ALL LP category.
- **N5AW** for setting a new North America record in the PHONE SO ALL LP category.
- **RS3A** for setting a new Europe record in the PHONE SO ALL HP category.
- **RT0F** for setting a new Asia record in the CW SO ALL HP category and achieving the highest score outside Oceania in the CW section of the contest.
- **UA5C** for setting a new Europe record in the CW SO ALL HP category.
- **UT7QF** for setting a new Europe record in the CW SO ALL LP category.
- **V51YJ** for setting a new Africa record in the CW SO ALL LP category.
- **VK2BJ** for setting a new Oceania record in the CW SO ALL LP category.
- **YV5EPM** for setting a new South America record in the PHONE category.
- **ZM4G** for winning the Oceania SO 40M HP category in both the PHONE and CW sections, and setting a new Oceania record in the PHONE section.

A summary of the results is provided in the remainder of this section. An analysis of the activity in the 2013 contest and historical trends is provided in section 2. The detailed scores, along with soapbox comments and information about the equipment and antennas used, are provided in sections 3 to 8.

The following abbreviations are used to describe the various entry categories: **ALL** = All Bands, **CK** = Check Log, **HP** = High Power (Total output power greater than 100 watts), **LP** = Low Power (Total output power no more than 100 watts), **M1** = Multiple Operators and Single Transmitter, **M2** = Multiple Operators and Two Transmitters, **MM** = Multiple Operators and Multiple Transmitters, **SO** = Single Operator, and **SWL** = Shortwave Listener.

SWL PHONE Plaque	Top Entrant from outside Oceania in PHONE Short Wave Listener category	Patrick Marteville F-59706	DE1ASP

**Table 13: SWL Plaque and Trophy Winners**

The Australia Club plaque is awarded to the local club from Australia with the greatest number of member stations participating in the contest. The Geelong Amateur Radio Club won this plaque in 2012 and has won it again in 2013 with 6 eligible logs from members VK3ALB, VK3NCC, VK3NW, VK3NRW, VK3WK, and VK3ZIB. The runner up was Eastern and Mountain District Radio Club with its members submitting 5 eligible logs.

The New Zealand club plaque was a new plaque in the 2013 contest. It is awarded to the local New Zealand NZART Branch, DX club, or contest group with the greatest number of single operator entries from its members. The inaugural awarding of this plaque goes to the East Coast Contesters group with 13 eligible entries from ZL2AL, ZL2GQ, ZL2LF, ZL2ST, ZL2WG, ZL2YL, ZM2IO, ZM4G and ZM90DX.

There were no Asian entrants in the PHONE or CW M2 categories so the ASIA M2 PHONE and M2 CW plaques have not been awarded.

The ongoing sponsorship of plaques is important for maintaining and growing interest in the contest. New sponsorship offers are always welcome and anyone who is interested in becoming a sponsor should contact the Committee. The cost of sponsoring a plaque is AUD 50.00 per annum, to cover the expenses associated with the manufacture and delivery of the plaques.

Certificates have been awarded to the top scoring station in each category for each continent and country. Additionally, a participation certificate identifying the number of successful QSOs has been awarded to each station that participated in the contest. The certificates are available online for downloading and printing by individual entrants at their convenience. The web link to the certificates is published on the OCDX contest web site at [www.oceaniadxcontest.com](http://www.oceaniadxcontest.com).

Printed certificates will only be delivered via the postal service in response to written requests from entrants who won a category in their country and made more than 10 QSOs in that category. Such requests can be emailed to the contest committee at [info@oceaniadxcontest.com](mailto:info@oceaniadxcontest.com) and must be lodged by 31 July 2014.

## Log Checking

Approximately 2% of the logs are still being submitted in paper format. The contest committee converts each of these paper logs to Cabrillo format so that they can be cross checked and scored using the same process as the other electronic logs. Although somewhat time consuming, the committee considers that this additional effort is reasonable in order to avoid discriminating against operators who only make a few QSOs and are unable to use, or do not have access to, an electronic logging capability.

A log checking report is available for each entry in the contest. This report provides detailed information about any QSOs that have been removed from the score calculation, along with the reasons for their removal. Entrants can request a copy of their log checking report by sending an email to the Contest Committee at [info@oceaniadxcontest.com](mailto:info@oceaniadxcontest.com).

Approximately 39% of the logs had no score reduction, 31% incurred a reduction of up to 10%, and 30% incurred a reduction greater than 10%.

Entrants are reminded that **WA7BNM** provides an on-line web form that can be used by entrants to manually enter log data to produce a Cabrillo file and then submit it to the email robot. This form is intended for entrants who are using paper logging, or logging software that doesn't produce a Cabrillo file. The form is available at <http://www.b4h.net/cabforms/>.

## 2014 Contest

The 2014 Oceania DX contest will be held on the first two full weekends of October 2014 as follows:

**PHONE:** 08:00 UTC Saturday 4 October to 08:00 UTC Sunday 5 October  
**CW:** 08:00 UTC Saturday 11 October to 08:00 UTC Sunday 12 October

More information about the contest, including the rules, is available from the Oceania DX Contest web site at [www.oceaniadxcontest.com](http://www.oceaniadxcontest.com) . Email inquiries should be addressed to [info@oceaniadxcontest.com](mailto:info@oceaniadxcontest.com) .

## Acknowledgments

The successful running of the Oceania DX Contest is a large team effort involving contributions from around the globe.

Although the log reception, log checking and certificate production processes are largely automated, committee members are still required to contribute many hours of effort per annum to manage these processes, and to administer and promote the contest.

The support of the following people and organisations is also acknowledged and greatly appreciated:

- **NZART, WIA** and the **other sponsors of awards**.
- **K1EA** for the provision of the log checking software.
- **N5KO** for hosting the email robot.
- **K5TM** for publishing the on-line certificates.
- **WA7BNM** for the provision of the on-line Cabrillo web form.
- **ZL1AXG** for the hosting of the [www.oceaniadxcontest.com](http://www.oceaniadxcontest.com) web pages.

Finally, and most importantly, thank you to everyone who participated in the 2013 contest and made it such a success. We look forward to seeing you all again, along with new entrants, in the 2014 event. Let's make it the biggest and best Oceania DX Contest party yet!

73 from

Oceania DX Contest Committee

VK3MI/ZL1AZE, VK3TZ, VK7GN, ZL3GA, VK2HN, VK6DXI

---

Atsuo **5W1SA** was the leading station from Oceania in the CW Single Operator 80M Low Power category and also set a new record for Samoa.
