

Worked All Europe DX Contest (WAEDC) SSB 2012

Final scores

These are the final results of the WAEDC SSB Contest 2012. For this contest we used a database containing 271041 QSOs and 236840 QTCs created by 1132 different entrants. A total of 15885 callsigns is estimated to have been on the air. 170769 of all contacts could be crosschecked directly log to log. 82918 of the contacts could be verified indirectly by tracking active callsigns in the database that have not submitted a log. The remaining 17354 callsigns represent 'uniques' but are left in the database. Thus, one can say, that 93.6% of all contacts could be verified, leaving only a very small amount of doubtful QSOs. Marco (DJ4MH) checked the logs with help of Holger (DF1QR) and Peter (DL2YCA). Special thanks to Michael (DL6MHW) for the new webcheck software and Julian (DL6OCK) and Werner (DL4NER) for their assistance. If you have any questions please send an E-mail to waedc-info@dxhf.darc.de (07.12.2012) Helmut, DF7ZS
