

# Summits on the Air

## Australia - Tasmania (VK7)

### Association Reference Manual

Document Reference	S112.1
Issue number	1.0
Date of Issue	28-September-2014
Participation start date	1-October-2014

Authorised	SOTA MT	Date	28 September 2014
Association Manager	Justin Giles-Clark VK7TW		
<b>Summits-on-the-Air</b>	<b>an original concept by G3WGV and developed with G3CWI</b>		

**Notice:**

“Summits on the Air”, SOTA and the SOTA logo are trademarks of the Programme. This document is copyright of the Programme. All other trademarks and copyrights referenced herein are acknowledged.

## **Disclaimer**

Bushwalking and mountain climbing are potentially hazardous activities. Mountainous terrain is subject to rapid changes in weather, and higher elevations can experience snow at any time of the year. The terrain may be unstable and subject to rock-falls and other hazards. The Tasmanian countryside is home to three species of snakes, all of which are venomous and can be fatal, or lead to serious consequences. Other animals such as some spiders and ants can bite with potentially serious consequences. Some spiders carry venom that can lead to death. The Tasmanian bush is also home to Jack Jumper ants which have a bite that can cause anaphylactic shock in some people. Some people may suffer from conditions that cause those persons to enter shock from certain ants or wasp bites.

The SOTA Management Team, the Australia – Tasmania Association and their officers shall not accept responsibility for any death, injury or liability in any form resulting from participation in SOTA activities within any state or territory within Australia or anywhere else in the world.

The inclusion of a summit in this Reference Manual does not indicate that it is safe, legal, or even possible to climb the summit. The Summit Reference data is not guaranteed to be accurate and no reliance shall be placed upon it.

Any participant shall check applicable local government, state and Commonwealth laws to be sure that a bushwalk or climb up any of the summits listed in this manual is legal. Some summits in this manual do reside on private property and the pursuit of SOTA activities shall respect private property rights. Some areas of Australia are public land, but are closed to public access, including “closed” water catchment areas and “reference areas” within parks managed by National Parks authorities. Significant criminal penalties can apply if participants enter these areas.

As a particular caution to European hikers, please note that “Every Man’s Right” does not exist in Australia; permission to cross private lands must be expressly granted and cannot be assumed.

Some Tasmanian mountains are very challenging during winter and require considerable steep snow and ice handling skills, including the equipment and knowledge of how to self-arrest. It is up to the individual to determine his/her personal assessment of fitness level, skill, training and experience to safely attempt bushwalking or climbing in Tasmania.

The Australia – Tasmania Association is Incorporated under SOTA rules, but it is merely an informal mechanism to advise the international SOTA program. There is neither an Incorporated Association or an Unincorporated Association under any state or territory in Australia that operates within Australia.

## 1. Change Control

Date	Version	Details
28-September-2014	1.0	First Release

## 2. Association Reference Data

<b>Association</b>	<b>Australia (VK)</b>
Commencement date	1 October 2014
Regions within Australia	
Tasmania – Regions	NW - North West NC - North Central NE - North East WC - West Coast CH - Central Highlands EC - East Coast SW - South West SC - South Coast
Association parameters	
Summit operation criteria	Operation must be within 25m vertically of the summit
All VK7 regions	
Band 1, score 1 point	< 500m a.s.l.
Band 2, score 2 points	>= 500m a.s.l. < 650m a.s.l.
Band 3, score 4 points	>= 650m a.s.l. < 800m a.s.l.
Band 4, score 6 points	>= 800m a.s.l. < 1000m a.s.l.
Band 5, score 8 points	>= 1000m a.s.l. < 1200m a.s.l.
Band 6, score 10 points	>= 1200m a.s.l.
Seasonal bonus	Yes
Bonus rational	High peaks subject to snow and ice, high winds, and many road closures adding significantly to summit remoteness
Min. height for bonus	3 points for activations >= 1200m a.s.l.
Bonus period dates	15 June to 14 October inclusive
Association sponsored awards	None
Association Manager	Justin Giles-Clark VK7TW vk7tw@wia.org.au

## **2.1. Program derivation**

The Australia – Tasmania Association is an extension of similar programs active in countries around the world. The list of summits is based on mapping data available from:

Tasmania: Geoscience Australia, the Tasmanian Government – Department of Primary Industries, Parks, Water and Environment - The List Service. The list of summits is believed to be comprehensive, but not necessarily exhaustive.

The summit reference list shall be updated on a regular basis. Your help to identify new summits is not only welcome but encouraged where you are aware of any summit not referenced in this manual that meets the association criteria. Please refer to section 2.9 Process to maintain summit reference list. In particular, the association seeks to extend the program to other states and territories throughout Australia, including the external territories.

## **2.2. General information**

The SOTA General Rules shall govern and take precedence over any rules found herein.

Full text of the SOTA General Rules can be found at:  
<http://sota.org.uk/RulesAndGuidelines>

## **2.3. Final Ascent and Activation Zone**

The Australia – Tasmania Association defines the SOTA activation Zone as an unbroken area within 25 vertical meters of the summit.

The final ascent to the activation zone shall be made only by non-motorised means (walking, climbing, skiing, cycling, on horseback, etc). Note that some areas have government restrictions on what methods of ascent are permissible.

A Summit activated before a reference number is issued to it cannot be claimed for SOTA award points.

All regions within the Australia – Tasmania Association have the same award scheme, however this may change with respect of new regions that are added.

Should compliance of any of these rules appear impossible because of the peculiar topography of the summit or for activator safety reasons, contact the Regional Manager.

Feel free to contact the Regional Manager for any clarification as to whether activation of a particular summit shall be valid for SOTA credit.

## **2.4. Rights of way and access issues**

Neither SOTA nor the Australia - Tasmania Association have any knowledge concerning the land ownership or right of way issues of any summit or route to a summit.

It is up to each individual to ascertain the legal rights and obtain all necessary permission from the property owners of the route taken to reach a summit.

## **2.5. Maps and navigation**

At minimum, take a compass and topographical map(s) of sufficient resolution. It is strongly recommended to carry topographical maps that use the GDA94 MGA grid as this manual provides grid references using this datum shown in the summit reference as Zone,

## Summits on the Air – ARM for Australia-Tasmania (VK7)

Easting and Northing.

A GPS device should be carried only as a secondary source of navigation information. The GPS should use the GDA94 or GDA datum, and if that is unavailable, the compatible WGS84 datum. If display units are set to UTM or MGA, then these will be compatible with the grid references given in this manual. Latitude and Longitude are expressed in Decimal-Degrees using the GDA94/WGS84 datum. All Latitudes are negative and all Longitudes are positive. This system has been chosen for its compatibility with Google Maps. You need only enter a summit's decimal coordinates into Google Maps to see a topographic, satellite or road map of a summit or to find driving directions to the closest roads. Note that for many remote summits, Google maps may give misleading or inappropriate navigational information, so please use this service with care.

Note that some older Australian maps use the AGD66 datum. Both latitude/ longitude references and MGA grid references will be in error by about 130 metres using this datum. Use of this datum is not recommended, particularly for off-track navigation or accessing remote summits.

The SOTAwatch website is an excellent repository of summit access information, and all activators are encouraged to submit any mapping, trail, access permission or other specific summit advice they can acquire. Please be sure to respect intellectual property law when adding information to the SOTAwatch site.

<http://www.sotawatch.org/>

More information on Tasmanian Parks and Reserves can be found at:  
<http://www.parks.tas.gov.au/>

Tasmanian National Parks - <http://www.parks.tas.gov.au/index.aspx?base=236>

Tasmanian Wilderness World Heritage Area -  
<http://www.parks.tas.gov.au/index.aspx?base=391>

Tasmanian Reserves - <http://www.parks.tas.gov.au/index.aspx?base=400>

Topographical maps in Tasmania may be obtained from the Tasmanian Government – Larger Service Tasmania Shops and online at:

<https://www.thelist.tas.gov.au/app/content/home>

Online: <http://maps.thelist.tas.gov.au/listmap/app/list/map>

Maps Australia wide can be obtained from <http://maps.google.com> using the terrain feature. The Google Maps data tends to be of lower quality than maps from official sources.

The VK7 region has reasonable APRS coverage in the NW, North, NE, East, South and SE areas from the summits in these regions. There are obvious limitations in valleys and other areas geographically shielded from the digipeaters.

Maps can also be found at some retail book and outdoor adventure stores.

## **2.6. Safety considerations**

Check the Weather before going. Weather in alpine areas can change rapidly and unexpectedly so be prepared for any of the following conditions: freezing temperatures, snow, rain, strong winds and sun. These conditions are even more variable and intense over 1,200 meters above sea level. Remember temperatures will fall by as much as 3 degrees C per 300 metres. In most places in Tasmania temperatures vary greatly and

## Summits on the Air – ARM for Australia-Tasmania (VK7)

water availability can be limited. Not all water from streams and other non-treated sources can be considered safe to drink.

Lightning is always a danger! Know the early signs of weather associated with lightning. Upon the first sign of visible thunderstorms, lightning, or thunder, reduce your exposure immediately by descending below the treeline. Proximity to an antenna puts you at greater risk. Do not seek shelter under trees or rock outcrops.

Bushwalking is an inherently risky endeavour. The consequences of the lack of preparation can be tragic. While the risks you assume by participating in SOTA activities can never be dismissed, they can be greatly diminished through knowledge, preparation and experience. Each person shall judge for themselves whether an objective is achievable. The listing of a summit in the reference list does not imply that it is easy to reach that summit. Assess your skill and fitness levels realistically and travel well within your limitations. Remember, once you make the summit, you are only half the way home. Often the down climb is where most accidents occur due to fatigue and lack of focus.

Vehicle Condition must be appropriate for the roads you intend to travel. You can expect many of the access roads to be no better than steep gravel forestry roads. Many roads in remote areas are 4WD access only, and may be subject to seasonal closures. Heavy penalties apply for travelling on roads during seasonal closures.

Carry the Ten Essentials. The “Ten Essentials” is a list of essential items bushwalking authorities deem necessary for safe travel in the bush.

1. Map(s) (optional notebook, pen and camera in waterproof bag)
2. Compass (optionally supplemented with a GPS receiver)
3. Sunglasses and sunscreen
4. Extra food and water
5. Extra clothes (including waterproof coat with hood)
6. Headlamp (outdoor)/flashlight
7. First aid kit
8. Fire starter
9. Matches
10. Knife

Note that many parks in Australia are subject to limitations or permanent bans on non-emergency use of fires. All areas of Australia are subject to declarations of Total Fire Bans.

Beware of wildlife. Snakes call Australia home and in Tasmania all three of the snakes are venomous and can kill or severely injure you. Understand their range and behaviour so you can take necessary precautions.

Physical Fitness is required. Some of the summits listed in this manual require a significant degree of physical exertion to reach the summit. Some summit access is only off track. Know your limitations, listen to your body and put your health before amateur radio. Check your pulse under heavy exertion and remember to slow down, bring plenty of water and enjoy the activation. Medical evacuation from many of the listed summits is slow and difficult. A heart attack in remote areas is likely to result in death as medical services require some time to respond.

Proper Clothing is necessary. You should never venture into major mountains areas

## Summits on the Air – ARM for Australia-Tasmania (VK7)

without walking boots, layered clothing to match the conditions and protection against possible rain or snow. A waterproof coat with hood is a good idea. A camera

Mobile phone coverage in Tasmania can be poor in areas away from major roads and towns. Telstra, Optus and Vodafone are the major mobile phone networks in Australia. Their coverage maps can be found at:

Telstra: <http://www.telstra.com.au/mobile-phones/coverage-networks/our-coverage/>

Optus: <http://www.optus.com.au/network/mobile/coverage>

Vodafone: <http://www.vodafone.com.au/aboutvodafone/network/checker>

Mobile phones that support 3G in both the 850 and 900 bands will have greater coverage, especially in an emergency. Note that dialling 112 may work where dialling 000 does not.

Proper track etiquette is expected. Keep to the walking tracks where they can give access to the summit. Off-track walking requires significantly greater navigational skills, but is required for access to some summits.

Respect other bushwalkers and the environment and take out what you bring in.

Bushfires are an increasing threat with global warming and drought. Fire bans are strictly enforced with heavy fines for noncompliance. Check with the Tasmania Fire Service:

<http://www.fire.tas.gov.au/> regarding any fire bans. It is your responsibility to be aware of any fire ban that has been declared.

### **2.6.1.      Becoming lost**

If you become lost and are unable to recover to a known position, then you should call 000 or 112 and ask for Police. If unable to make phone calls to either of these numbers, then attempt to reach higher ground where mobile phone coverage may be found. If you are in very remote areas, then coverage may not exist even at higher ground.

If you are unable to contact Police, then you should remain near your current position, if safe to do so. Fires attract attention and smoke can be seen from the air. Construct the best possible shelter from the materials that may be available to you and preserve food. If forced to descend into gullies and valleys to obtain water, again remain in a position near the water source, and do not attempt to continue down the valley. Terrain in valleys can be impassable and is often more hazardous than ridges, which you would have likely been using to access the summit before coming lost. It is also easier to locate a “static” alert missing person than a “dynamic” missing person who is still moving around.

A call on the local amateur repeaters may also provide assistance if required.

Information about repeaters around Australia and VK7 can be found at:  
<http://www.wia.org.au/members/repeaters/data/>.

## **2.7. Foreign Amateur Radio Operators in Australia**

Please refer to: <http://www.acma.gov.au/Industry/Spectrum/Radiocomms-licensing/Class-licences/overseas-amateurs-visiting-australia>

## **2.8. Association Awards**

There are currently no Australia- Tasmania Association specific awards.

## **2.9. *Process to maintain summit reference list***

The summit list is maintained by each regional manager. Additional summits that have been identified shall be added on a periodic basis.

A new summit may be requested to be included in the list by contacting the regional manager.

Following a review and verification, including approval by the SOTA Management Team, as to whether the summit meets both the General and Regional criteria the summit shall be added to the list.

All potential new summits must meet the guidelines found under the SOTA General Rules:

<http://sota.org.uk/RulesAndGuidelines> and have a prominence higher than 150 metres.

### 3. Summits Reference

#### 3.1. Tasmania – North West Region – NW

Association	Australia – Tasmania. (VK7)
Region	Tasmania – North West Region (NW-xxx)
Region Manager	Justin Giles-Clark VK7TW

##### 3.1.1. Regional Notes

Winter bonus applies from 15 June to 14 October.

Includes King and South Hummock Islands.

##### 3.1.2. Table of Summits

Ref.	Summit Name	Alt (m)	Alt (ft)	Longitude	Latitude	Zone	Northing	Easting	Valid From (DD/MM/YYYY)	Valid To (DD/MM/YYYY)	Score
